

Linear: Exporting to more than 95 countries worldwide

Linear was founded by Vescovi Pietro & Son in 1973 as a company that "manufactured electronic devices," starting with the production of television transmitters for the Italian market, which at that time was open and officially unlicensed. This period served as a good example and provided much experience for dealing with the

through its distributors. Linear showcases its products at all of the most important international exhibitions including NAB in Las Vegas, U.S.; IBC in Amsterdam,

producing advanced, forward-looking equipment. The firm's philosophy consists of creating user-friendly and dependable gear able to meet the needs of a

UHF
 - Analog transmitters from 10 W to 20 KW, VHF and UHF
 - Digital and analog microwave link up to 14 GHz

- MPEG 2 encoders, decoders, multiplexers
 - Offset and GPS synchronizations

rest of the world as regards improving the quality and technology of equipment design and manufacturing. In 1977 the company changed its name to Linear F.lli Vescovi Snc and in 1993 made its swift transition to the present-day name of Linear S.r.l. Since its early days, Linear's success has been based on yielding efficiency along with the importance of the 'human element.' With its headquarters in Chiari BS in Northern, Italy, Linear's site expands over 4000 square meters. The premises houses the administration, sales and marketing, technical, research and development, building and assembling, testing and service, mechanical, warehouses and archives departments.

Client contact

Since 1983, Linear has been exporting its products and today boasts clients in more than 95 countries worldwide. The company provides products and services either directly or

Netherlands; Broadcast Asia in Singapore; NAT in Moscow, Russia; and IBTS in Milan. The company prides itself on reinvesting a large part of its profit into research and development. Thanks to its highly qualified engineers, Linear continues its tradition of

continually evolving broadcast market. In-depth research, which takes into consideration demand analysis and customer feedback, ensures that all products are tailored to suit the requirements of any client in any climate, whether located in the artic or in the desert. Linear directly

- Remote control
 - Antennas and accessories
 After being tested, every product – which comes with a technical manual and test and tuning report – is allocated a serial number for future reference. With more than 30 years of experience in designing trustworthy, state-of-the-art equipment, Linear S.r.l. guarantees dependable service and is the ideal partner for both national and international broadcasters.
