

SIRA: RF technology leader with installations in 70 countries

Sira Sistemi Radio was founded in 1977 by a group of technicians active in the telecommunications field and specialized in radio frequency (RF) technology. Sira is a privately owned company, member of the Kathrein Group. The company headquarters is located in Caponago (Milan), Italy. Since 2002 Sira has been acting as the sole

agent/distributor for Kathrein KG telecom products for the Italian market. In 2004 Sira became the Kathrein Group center of technical competence for TETRA/TETRAPOL antennas and WLL/WLAN antennas. Sira prides itself on its vast experience in the development of RF systems and associated components such as:

- Antennas
 - Filters
 - Transmitting and receiving multicouplers
 - Motorized and manual coaxial switches
 - Directional couplers
 - 3dB couplers
 - Coaxial connectors
 - Coaxial adaptors
 - Dummy loads
 - Coaxial rigid lines and relative accessories
 - Isolators and circulators
- Sira is specialized and a world leader in the following fields:
- Radio and TV broadcasting
 - Civil telecommunications
 - Military communications
- There are Sira installations in more than 70 countries worldwide; more than 80 percent of its sales are destined to the international market where Sira is a world leader in RF technology.

Research and Development

As a major portion of its cross revenues, Sira has been investing in research and development, quality and reliability control and product safety in the RF field. This policy of investment has given Sira an extremely high level of experience in its field; thus the

company is capable of dealing with complex systems and providing solutions to meet customer requirements worldwide.

Sira is a customer oriented company, which has adopted the philosophy of working together with its customers to meet the critical technical requirements for their systems with an attitude of enthusiasm and concern in order to provide the best results. This approach has given Sira a position of leadership in its field. Sira products are designed and

manufactured in accordance with the various international standards where the products will be installed and operated. Company performance and products are directly related to the quality and the training of its personnel. Sira, in fact, dedicates much attention to the professional development of its staff so as to ensure state-of-the-art products and service. Furthermore, Sira actively collaborates with universities and departments of scientific institutions for the training of its personnel, thus guaranteeing advanced technology in the design and manufacturing of its products.
